भारत सरकार पंजीकृत Diploma In Complex Homeopathy Science

Description

Homeopathy is a medical system which is based on the belief that the human body can cure itself. The professionals who practice homeopathy use very tiny amounts of natural substances, such as minerals and plants. They have a belief that these minerals/ plants help in stimulation of the healing process. Homeopathy was developed in the 1700s in Germany, it is common in many European countries. The basic belief behind the concept of homeopathy is "like cures like", something that brings on symptoms in a healthy person can, in a minimal dosage, treat an illness with similar looking symptoms. These are meant to trigger the body's natural defense mechanism and immune system.

Course Content

1. Anatomy
2. Embryology
3. Homeo Therapeutics
4. Materia Medica
5. Pathology
6. Obstetrics
7. Virology
8. Parasitology
